## **“Used” 14” J.L. Becker Mesh Belt Brazing Furnace**

One (1) electrically heated J. L. Becker mesh belt brazing furnace with:

- 14” wide belt
- 2 heating zones (86/40 kW) with new Globar™ heating elements (packaged separately)
- three (3) water-jacketed cooling sections
- a 5 ft. charge table
- a 4 ft. discharge table
- a variable speed belt drive unit
- Barber Colman temperature controllers
- complete with three (3) control panels and two (2) heating transformers.

One (1) lot miscellaneous connecting conduit and wire, piping, and exhaust ductwork. Some additional wiring and piping will be required at installation.

Furnace line was originally installed in the 1990’s. The line was operational and running fine prior to removal.

The equipment can be viewed in our Farmington Hills, MI facility upon request.

We can provide any transportation, installation or refurbishment services if desired. Price can be quoted upon request.
